DATE MAILED: 12/09/2003

Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$665.00
 - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$240.00
 - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$320.00
 - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Allowable Subject Matter

1. **Claims 1-12** are allowed, claims 12, 4, 8, 9, 11, 5-6, 10, 7 have been re-numbered to 4-12 respectively.

The following is an examiner's statement of reasons for allowance:

The present invention relates to a method for automatically finding an AM radio program, by which an AM radio receiver is tuned through in discrete steps, such that, for each set AM frequency, the reception quality at the currently set AM frequency is determined, the field strength of the neighboring frequencies is measured. If a significant field strength is detected at the neighboring frequencies, these are taken into account in determining the overall reception quality, in that the reception quality is reduced by a noise value, and subsequently the overall reception quality is compared with an upper quality limit. If the upper quality limit is exceeded, the program search is interrupted, and the AM radio program with this high overall reception quality is played. This method succeeds in reducing the number of misjudgments of AM radio programs with actually poor quality, and thus improves the reproduction quality of an AM radio receiver.

The closest prior art, Yamada (U.S. 4,509,203) shows an auto tuning receiver with a tuning information memory. Yamada teaches the means for storing field intensity signals characteristic of the intensities of broadcasts at the same time as tuning frequencies are stored.

However, Yamada fails to teach or fairly suggests "... a control unit that receives said signal strength value, reduces the value of said signal strength value based upon signal noise on a channel F_{n-1} , to provide a corrected signal strength value, and writes to said memory device a frequency signal value indicative of said certain channel F_n and provide said command signal to tune said tuner to said certain channel F_n when said corrected signal strength value is greater than a threshold value...". This distinct feature has been added independent claim 1 and renders it allowable.

Regarding independent claim 4, Yamada also fails to teach the step of "...measuring the field strength of the neighboring frequencies, and, if a field strength is detected at the neighboring frequencies, these are taken into account in determining the overall reception quality, in that the reception quality is reduced by a noise value, and subsequently the overall reception quality is compared with an upper quality limit, and, if the upper quality limit is exceeded; the through-tuning process of the AM radio receiver is stopped, and the AM radio receiver is set to the AM frequency with sufficient overall reception quality, while otherwise the through-tuning process is continued..."

Regarding independent claim 5, Yamada also fails to teach the method for "...automatically finding and storing an AM radio program, by which an AM radio receiver is tuned through in discrete steps, such that, for each set AM frequency, the reception quality at the currently set AM frequency is determined, the field strength of the neighboring frequencies is measured, and, if a field strength is detected at the neighboring frequencies, these are taken into account in determining the overall reception quality, in that the reception quality is reduced by a noise value, and

Art Unit: 2685

subsequently the overall reception quality is compared with an upper quality limit, and, if the upper limit is exceeded, the AM frequency with sufficient overall reception quality is stored in an AM radio program memory, and subsequently the through-tuning process, together with the evaluation of the overall reception quality, is continued until the entire AM frequency band has been tuned through, in such a way that the stored AM frequencies can be retrieved by actuating station keys on the AM radio receiver..."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
